End

2. Deskripsi Singkat Program

Program ini digunakan untuk mencari nilai jarak antara meter, centimeter, dan kilometer

3. Source Code

```
#include <iostream>
#include <string>
#include <cstdlib>
using namespace std;

int main() {
    string username, password, registUser, registPass;
    int kesempatan = 3;
    int pilihan;
    double nilai;

    cout << "===REGISTRASI AKUN===" << endl;
    cout << "Buat Username           : ";
    cin >> registUser;
    cout << "Buat Password (3 digit NIM): ";
    cin >> registPass;

    cout << "\nAkun berhasil dibuat!\n\n";

    while (kesempatan > 0) {
        cout << "Username : ";
        cin >> username;
        cout << "Password : ";
        cin >> password;

        if (username ==registUser && password == registPass) {
            cout << "\nLogin berhasil!\n";
            system("pause");
            break;
        } else {
            kesempatan--;
            cout << "\nLogin gagal! Sisa percobaan: "
                 << kesempatan << endl;
        }

            if (kesempatan == 0) {
```

```
        cout << "Anda salah login 3 kali.\n";

    return 0;
}
```

4. Hasil Output

Fitur Dasar:

```
===REGISTRASI AKUN===
Buat Username           : bin
Buat Password (3 digit NIM): 123

Akun berhasil dibuat!

Username : bin
Password : 123

Login berhasil!
Press any key to continue . . .

=============Pilihan Fitur=============

1. Konversi Meter ke Kilometer dan Centimeter

2. Konversi Kilometer ke Meter dan Centimeter

3. Konversi Centimeter ke Meter dan Kilometer

4. Keluar

Pilihlah menu dari (1-4) diatas
```

Pilihan 1:

```
== Masukkan Nilai Meter ==

Nilai:
5

Hasil Konversi:

5m = 0.005Km

5m = 500Cm
```

Pilihan 2:

```
== Masukkan Nilai Kilometer ==

Nilai:
6

Hasil Konversi:

6Km = 6000M

6Km = 600000Cm
```

Pilihan 3:

```
== Masukkan Nilai Centimeter ==

Nilai:
6

Hasil Konversi:

6Cm = 0.06M

6Cm = 6e-005Km
```

5. Langkah-langkah GIT

```
Asus@DESKTOP-VRPT5VC MINGW64 /d/Test Github
$ git init
Initialized empty Git repository in D:/Test Github/.git/
```

5.1 GIT Add

```
$ git add .
```

5.2 GIT Commit

```
$ git commit -m "first commit"
On branch master

Initial commit

nothing to commit (create/copy files and use "git add" to track)
```

5.3 GIT Push

```
$ git push -u origin main
